

Green Supreme Premium Pellet Fuel

Quality characteristics are as follows

Heat Value	8,000 to 8,300 BTU's/lb. at 3% moisture content
Moisture Content	3 to 5 %
Ash Content	0.4 to 0.6 % (PFI premium standard <1% by weight)
Density	≥40 lb. /cu ft.

Green Supreme Premium Pellet Fuel is of high quality and is made from a proprietary blend of 90% hardwood and 10% softwood species native to the Northeast US. This wood is then dried and compressed at one of our three manufacturing facilities in New Hampshire and New York. Our commitment is to produce a consistent, high quality pellet, for which we have gained a well-earned reputation.

Green Supreme Premium Pellet Fuel meets or exceeds the specifications of the Pellet Fuels Institute for a premium grade pellet fuel. For more information on these specifications see www.pelletheat.org. Green Supreme Premium Pellet Fuel is manufactured by New England Wood Pellet, LLC.
